

Acme Vaults

Curated USDC yield vaults that keep a 10% performance fee on the yield they earn. **Fictional example.**

4.8_{/10}

Average of 8 categories
Confidence: Medium

⊞ **WATCH, do not back yet**

TL;DR. A small, real-yield vault business with doxxed founders and verified deposits of \$41.2M, a third of the homepage claim. The 2-of-3 Safe can upgrade the vault with no delay, which caps security at 4. Fee income is modest and the category is crowded. Watch for a timelock and published points rules.

DEPOSITS	HOMEPAGE TVL	DEPOSITORS	FEE INCOME	RANK VS DIRECT PEERS	FUNDING
\$41.2M	\$120M	2,310	\$0.6M	#4 of 7	\$4M
verified, totalAssets()	claimed	top 10 hold 58%	per year, derived	on deposits	seed, 2026

SCORECARD

M1 Technology and security		4.0 Weak
M2 Legal and regulatory		3.5 Weak
M3 Business model and economics		5.0 Mixed
M4 Team		6.0 Mixed
M5 Traction and metrics		5.5 Mixed
M6 Tokenomics and governance		4.5 Weak
M7 Market, peers and valuation		5.0 Mixed
M8 Community and X sentiment		5.2 Mixed

Scale 1 to 10, equal weights. Tech is capped at 4 by the admin-key rule (about 5.5 without it).

KEY FACTS

Entity	Acme Vaults Ltd (fictional), registry n/d
Team	2 founders, doxxed
Funding	\$4M seed
Token	None; points programme
Audits	1 (2026-06), 2 high fixed
Admin	2-of-3 Safe, no timelock
Licence	None claimed
Revenue	about \$0.6M per year, derived

STRENGTHS

- + Real yield with a simple fee model, no emissions needed to pay depositors.
- + Verified contracts, one audit with all high findings fixed.
- + Doxxed founders with verifiable DeFi track records.

RISKS

- A 2-of-3 Safe can upgrade the vault instantly: no timelock over user funds.
- Deployed code is 140 lines larger than the audited commit.
- Homepage TVL is three times verified deposits.
- Deposits fell 35% when the points boost ended.

PEERS

Peer A (EVM)	mcap \$310M, TVL \$900M	mcap/TVL 0.34
Peer B (Solana)	mcap \$95M, TVL \$210M	mcap/TVL 0.45
Peer C (Move)	no token, TVL \$60M	n/a

Illustrative value if tokenised, from peer mcap/TVL quartiles: \$12M to \$22M. Not a price target.

INVESTOR VIEW

Equity: fair at seed terms only with a timelock commitment.
Token / protocol exposure: nothing to buy yet; points farming carries the admin risk. **As a user:** size deposits to what you can lose to an upgrade.

WOULD RAISE THE RATING

- A 48 h or longer timelock on the ProxyAdmin
- A second audit of the deployed code
- Deposits holding up without boosts

WOULD LOWER IT

- An upgrade without notice
- Enforcement against the front-end
- Further deposit outflows
